

## SYBSC ZOOLOGY Paper III Semester IV

Q1) In the egg the area of heavy deposition of yolk is known as

- a) Animal pole
- b) Vegetal pole
- c) Lecithin pole
- d) Fatty pole

Q2) The eggs are heavily laden with yolk called as

- a) Polylecithal
- b) Alecithal
- c) Microlecithal
- d) Oligolecithal

Q3) This morphogenetic movements involves the movement of cells into the interior of embryo.

- a) Emboly
- b) Epiboly
- c) Anaboly
- d) Cataboly

Q4) Animals which do not develop coelom are called acoelomates.

- a) Platyhelminthes
- b) Achelminthes
- c) Annelida
- d) Mollusca

Q5) It is the prevention of conception by preventing the fusion of the gametes.

- a) Contraception
- b) Anticonception
- c) Unifertilization
- d) Difertilization

Q6) Find the odd term related to fertility awareness method

- a) Rhythm method
- b) Temperature method
- c) Billings method
- d) Lactation amenorrhea

Q7) Reduced sperm motility also results into infertility and is termed as

- a) Asthenozoospermia
- b) Teratozoospermia
- c) Azoospermia
- d) Oligozoospermia

Q8) In the oldest procedure of ART sperms are placed in the female reproductive tract by a physician. The procedure is termed as

- a) Artificial insemination
- b) Natural insemination
- c) Exfertilization
- d) Infertilization

Q9) These are used in aerosols, air conditioners, refrigerators and are responsible for ozone depletion.

- a) CFCs
- b) TFGs
- c) FFCs
- d) EGGs

Q10) It has given rise to climate changes like inconsistent rains, severe drought, and flood situations.

- a) Global warming
- b) Global trade
- c) Global change
- d) Global problems

Q11) Before taking up any activity which may affect the environment, it is important to estimate the generation of quantum of

- a) Carbon footprints
- b) Carbon footsteps
- c) Carbon production
- d) Carbon bleaching

Q12) Noisy domestic environment or neighbourhood can disturb health primarily related to

- a) Psychology
- b) Digestion
- c) Respiration
- d) Excretion
