

Project Implementation Guidelines

1. A learner is expected to carry out two different projects: one in Semester V and another in Semester VI.
2. A learner can choose any topic which is covered in Semester I- semester VI or any other topic with the prior approval from head of the department/ project in charge.
3. The Project has to be performed individually.
4. A learner is expected to devote around three months of efforts in the project.
5. The project can be application oriented/web-based/database/research based.
6. It has to be an implemented work; just theoretical study will not be acceptable.
7. A learner can choose any programming language, computational techniques and tools which have been covered during BSc course or any other with the prior permission of head of the department/ project guide.
8. A project guide should be assigned to a learner. He/she will assign a schedule for the project and hand it over to a learner. The guide should oversee the project progress on a weekly basis by considering the workload of 3 lectures as assigned.
9. The quality of the project will be evaluated based on the novelty of the topic, scope of the work, relevance to the computer science, adoption of emerging techniques/technologies and its real-world application.
10. A learner has to maintain a project report with the following subsections
 - a) Title Page
 - b) Certificate

A certificate should contain the following information –

- The fact that the student has successfully completed the project as per the syllabus and that it forms a part of the requirements for completing the BSc degree in computer science of University of Mumbai.
- The name of the student and the project guide
- The academic year in which the project is done
- Date of submission,
- Signature of the project guide and the head of the department with date along with the department stamp,

- Space for signature of the university examiner and date on which the project is evaluated.
- c) Self-attested copy of Plagiarism Report from any open source tool.
- d) Index Page detailing description of the following with their subsections:
 - Title: A suitable title giving the idea about what work is proposed.
 - Introduction: An introduction to the topic giving proper back ground of the topic.
 - Requirement Specification: Specify Software/hardware/data requirements.
 - System Design details : Methodology/Architecture/UML/DFD/Algorithms/protocols etc. used(whichever is applicable)
 - System Implementation: Code implementation
 - Results: Test Cases/Tables/Figures/Graphs/Screen shots/Reports etc.
 - Conclusion and Future Scope: Specify the Final conclusion and future scope
 - References: Books, web links, research articles, etc.
- 11. The size of the project report shall be around twenty to twenty five pages, excluding the code.
- 12. The Project report should be submitted in a spiral bound form
- 13. The Project should be certified by the concerned Project guide and Head of the department.
- 14. A learner has to make a presentation of working project and will be evaluated as per the Project evaluation scheme
